CARES4CAREGIVERS

Mobile App for Caregiver Supervision and Remote Monitoring
to raise productivity and quality in community healthcare

TETSUYU

CARES4CAREGIVERS

CARES4CAREGIVERS is a mobile application that raises the productivity and quality of care at home or centres. It is connected with CARES, our care management platform, to enable clinicians to collaborate on care delivery with caregivers and families.

- Easy to use Mobile App for Caregivers to follow and record care tasks
- Clinicians can instruct, monitor and supervise care remotely.
- Families can review daily care activities and be alerted of abnormal events.
- Secured, seamless and real time information sharing. Instant chat messaging
- Supports Home Care, Elder Care Centre and other care settings.

Benefits

Productivity
Consistency, Automation, Time Savings
Reduce Travel Time with Remote Monitoring and Interventions

Quality of Care
Caregivers follow and report on care tasks set by clinicians
Real Time Remote Monitoring, Supervision and Escalation. Improve Communication
