CARES@AAC Workflow

Prospecting	Pre-Enrolment	Enrolment	Reporting	Discharge
Identifying & Reaching Seniors	Smart Profiling for Tailored Care	Care & Engagement Programmes	Progress Tracking & Insight Generation	Care Completion & Future Support

Benefits

Seamless Integration

Measure and record senior information using CARES-compatible instruments, and incorporate medical data from federated or third-party systems and applications.

Ongoing Platform Support

Enjoy a smooth onboarding process with our extensive training programme and after-sales support. Regular service improvements and updates are available to all clients.
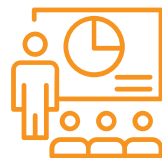

End-to-End Workflow

From prospecting to discharging, CARES@AAC is designed to streamline the AAC workflow. Task automation and specialised dashboards increase productivity while enhancing quality of care.

KPI Management System

Define and meet KPIs through valuable insights powered by data analytics. Platform tools allow staff to easily generate progress reports for submission to AIC.

Mobile & Portable

CARES@AAC's web-based platform can be run on browsers using any smart device, ensuring that AAC staff can access important work and information anytime, anywhere.

Scalable & Customisable

Setting up new centres with your existing framework is a breeze, enabling organisational expansion without the growing pains. Our flexible API is customisable to suit your needs.

CARES@AAC

Revolutionising Active Ageing Centres

CARES@AAC is an ASG-compatible AAC IT system equipping centre managers, staff, and caregivers with tools to manage the end-to-end workflow at Active Ageing Centres.

ASG-Compatible AAC IT System

Features

Senior Outreach List Importing

Import prospect lists from SGO, create actions plans and track senior outreach progress.
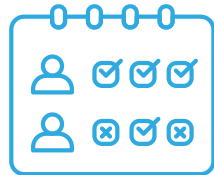

InterRAI CST Assessment Integration

Securely store and incorporate InterRAI CST assessment data into senior profiles, including scales & CAPS results.

Buddying & Befriending Management

Match volunteers to programmes and seniors based on interests indicated in their profiles, and track their activities.

Facial Recognition Attendance Recording

Take attendance at AAPs and AAC touchpoints through facial recognition technology, QR code or membership card scans.

Bluetooth-Enabled Vital Signs Systems

Seamlessly upload vital signs data during community health screening events with CARES-compatible equipment.

AIC Progress Report Generation

Automatically generate facility progress reports, incorporating all relevant data for submission to AIC.

KPI-Focused Analytics Dashboards

CARES is designed to collate relevant data into dashboards, providing insights into the success of your AAC.

Data-Powered Heat Maps

Heat map technology offers visual insights on population density to allow for better outreach planning in the area.
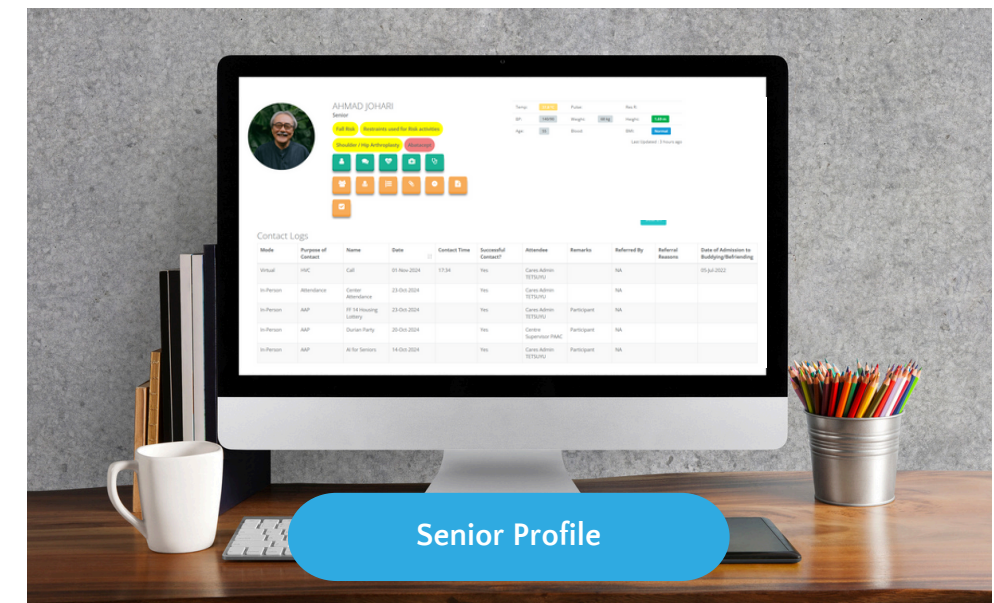

Payment & Invoice Management

CARES@AAC offers payment support for optional AAP charges, sale of merchandise and other billables.

Senior Profile

Vital Signs Tracking

Please note that some advanced features and modules are available as optional add-ons and may involve additional costs.

CARES@AAC

CARES@AAC provides a compatible, collaborative ecosystem that works together to record, collate and analyse data, allowing your managers and staff to continually improve the efficacy of your Active Ageing Centre.

AIC's prospect lists are imported into the CARES system, creating a profile and action plan for seniors.

EPOS integration facilitates event signups, payments and rewards redemptions.

With compatible Bluetooth-enabled weighing machines, blood pressure monitors, & glucose meters.

Integrating status & incident reports from Red Cross HoME+ monitoring system.

Track AAC KPIs through specialised dashboards and heat maps.

Smart Profiling

CARES4ME Wellness App

Gamified wellness app for seniors providing mood check-ins, medication reminders, AAP recommendations and signups.

Multi-Method Attendance

Mark event attendance through facial recognition technology, membership cards, and QR code scans.

Generative AI Call Centre

Customised system providing routine services and answering enquiries in multiple languages.

Foot at Risk Mobile App

Remote foot monitoring, treatment & intervention app for diabetic seniors.

EPOS Integration

Community Vitals Screening

HoME+ Monitoring System

Data Analytics Dashboards

InterRAI Assessments

Regular InterRAI assessments are incorporated into senior data for a tailored experience.
