CARES4WOUNDS is a medical device intended for use by clinicians who are managing wounds.

- Listed in HSA Class B Medical Device Register for Singapore
- Obtained CE mark for the European Union (EU)
- Listed in ANVISA as a Class II Medical Device, Notification No. 82320590002

# Benefits

## Higher Productivity

Get 1-second AI-powered 3D wound measurements and tissue classification.

## Enhanced Quality of Care

Painless, contact-free measurements with real-time updates for timely escalation and intervention.

## Guided Assessment & Treatment

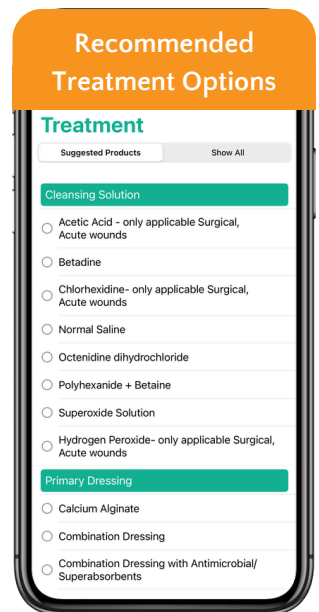

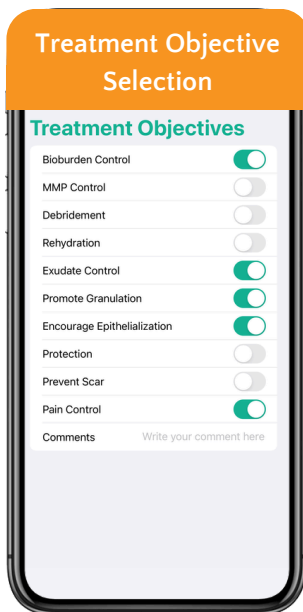

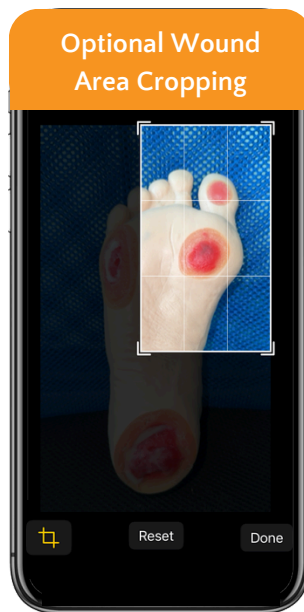

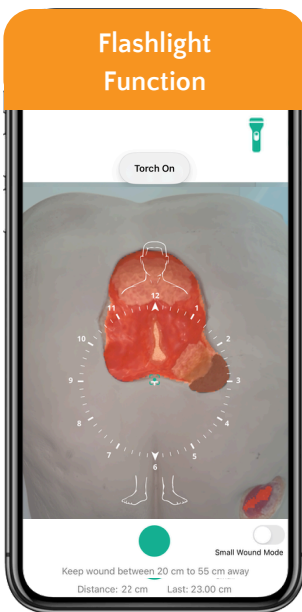

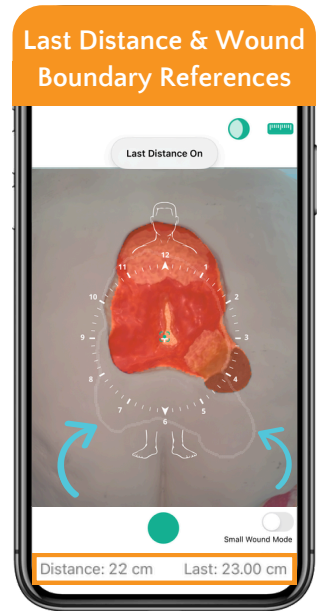

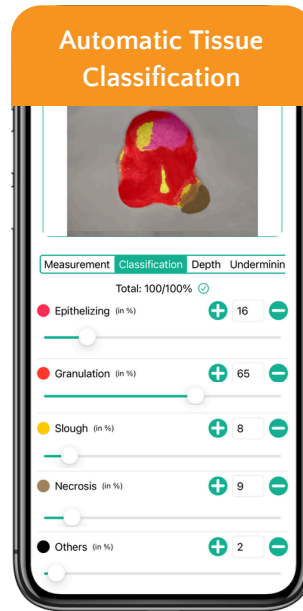

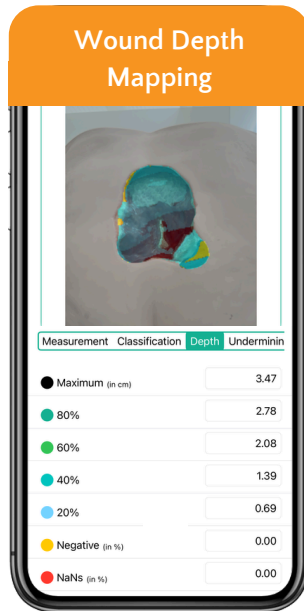

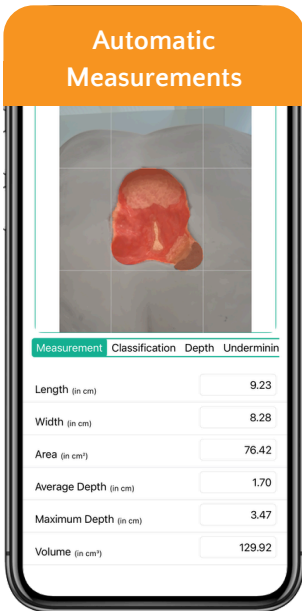

Built-in guidance and recommended treatments help less-experienced clinicians bridge knowledge gaps.

## Clinical Systems Integration

Integrated with aged care clinical systems such as Acredia and Platinum 6 for a single source of truth and streamlined workflows.
